

Watch HPO Concerts Using Apple TV

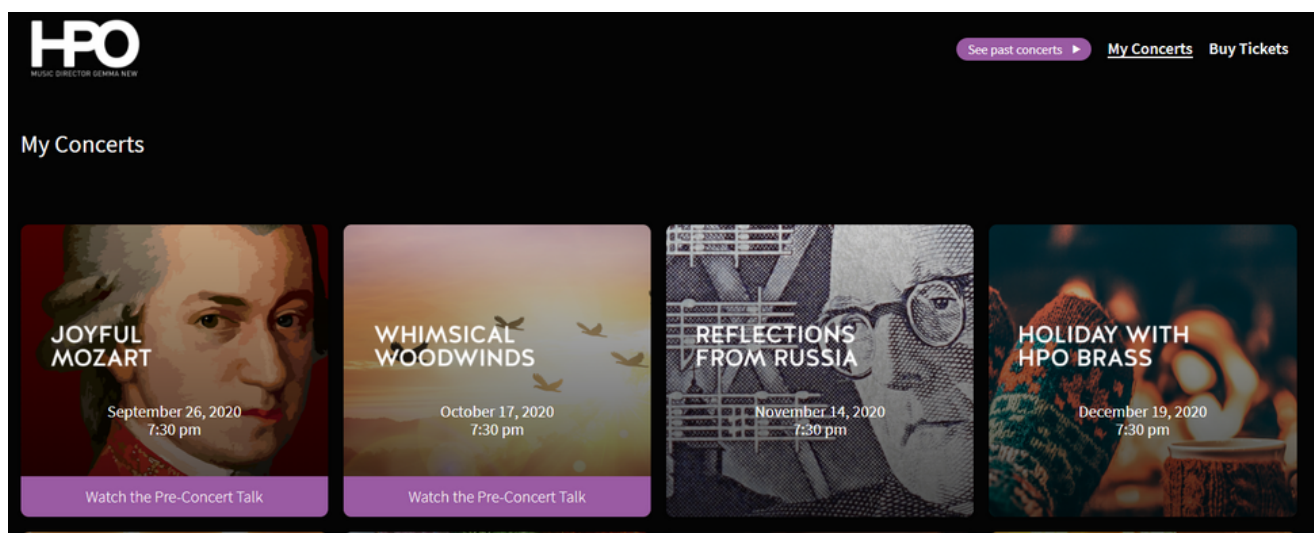

Patrons with Apple TV can watch concerts on their TV using the cast function on a smartphone or tablet and the **Safari web browser**.

1

First, make sure your Apple TV is connected to the same wi-fi network as your smartphone or tablet. Open the settings app on your device and the network app on Apple TV to ensure the wi-fi names match.

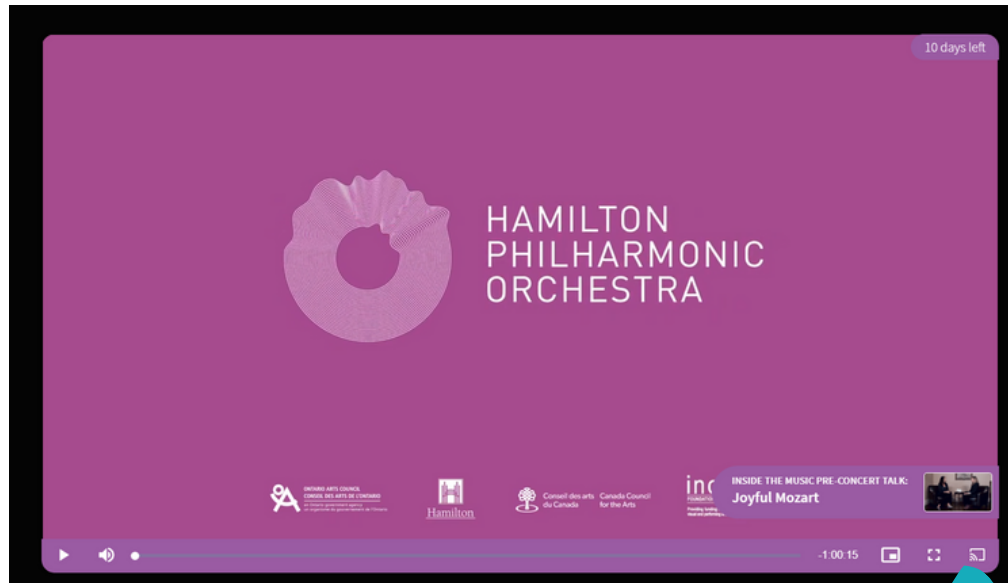

2

Next visit broadcast.hpo.org using the **Safari web browser** and login. Select "My Concerts" from the top of the screen and click the page for the concert you want to view.

3

Click the "cast" icon at the bottom of the video player, then select your Apple TV device. You should now see the video on your TV screen and be able to start, pause, stop and change the volume using your device.

Look for the cast symbol here!

Please note that the casting icon will only be visible when using the Safari web browser.
