

If you do not have a smart TV or streaming device, you can connect your home computer to your TV using an HDMI cable.

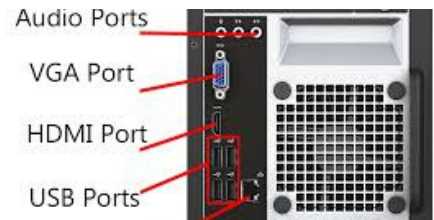

This is an HDMI cable. They can be purchased at most stores that sell electronics including Walmart and Best Buy.

Find the HDMI port on the back or side of your TV. See photos below for reference. (Note that even TV sets more than 10 years old have HDMI ports!)

Next find the HDMI port on your laptop or desktop computer

If you have a Mac computer, you may require an adaptor (example pictured) to connect the HDMI cable to your computer.

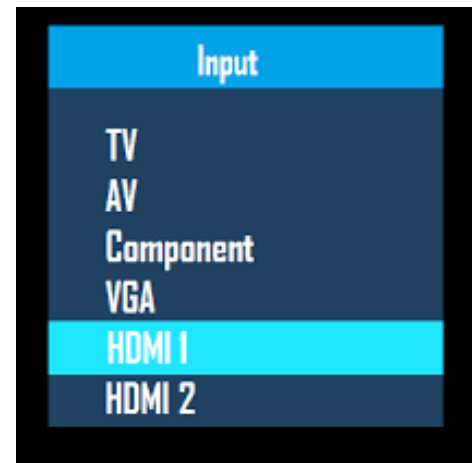

Once you have your cable and located both HDMI ports, follow the below steps.

1

Connect one end of your HDMI cable to your TV and the other end to your computer. Once connected a "No Signal" message may pop up on your TV screen.

2

On your TV remote control, find the "input" button, click and then select HDMI from the menu on your TV screen. Select the HDMI option that matches the number label on your TV's HDMI port.

3

Your computer screen should now appear on your TV screen. If it does not, try selecting the other HDMI # option on the input menu.

4

In your email inbox, search for an email from HPO.org. Click the link provided to our online concert viewing platform and login. Click the concert you have purchased access to and set the video to full screen. Now sit back, relax and enjoy the performance!
